

Main.m runs all the other files and produces all statistics and figure reported in the paper. In detail Main.m runs:

1. climate_persistent_wf.m: Computes the statistics for the baseline economy (Table 2, Panel B)
2. climate_persistent_nh_wf.m: Computes the statistics for the economy without hurricane risk (Table 2, Panel C)
3. climate_change_persistent_wf.m: Computes the statistics for the economy with climate change (Table 3, Panel A)
4. climate_change_freq_persistent_wf.m: Computes the statistics for the economy with a increase only in the frequency of hurricanes (Table 3, Panel B)
5. climate_change_int_persistent_wf.m: Computes the statistics for the economy with a increase only in the intensity of hurricanes (Table 3, Panel C)
6. climate_w_clause_persistent_wf.m: Computes the statistics for the economy with the coupon suspension clause (Table 4, Panel A)
7. climate_w_clause_persistent_durationmod_wf.m: Computes the statistics for the economy with the coupon suspension clause and adjusted durations (Table 4, Panel B)
8. climate_w_clause_persistent_durationmod_wf.m: Computes the statistics for the economy with the debt reduction clause (Table 4, Panel C)
9. climate_change_w_clause_persistent_wf.m: Computes the statistics for the economy with the coupon suspension clause (Table 5, Panel A)
10. climate_change_w_clause_persistent_durationmod_wf.m: Computes the statistics for the economy with the coupon suspension clause and adjusted durations (Table 5, Panel B)
11. climate_change_w_clause_persistent_pardef_wf.m: Computes the statistics for the economy with the debt reduction clause (Table 5, Panel C)
12. qfigure.m:
 - Runs climate_persistent_antiguafull.m
 - Runs climate_persistent_nh_antiguafull.m
 - Runs climate_w_clause_persistent_antiguafull.m
 - Runs climate_w_clause_persistent_antiguafull_pardef.m
 - Generates figures, 1,2,3
